82001 - Förkläde ekologisk bomull Royal Green	229 kr

Kosttillskott är ofta syntetiska.

Om vi fick bestämma så hör eran av syntetiska vitaminer och mineraler och standardiserade örter till det förflutna. Vi är övertygade om att hela livsmedel samt certifierade ekologiska kosttillskott är bättre källor med en bredare omfattning av aktivitet i kroppen.

Ekologisk mat är en gåva från naturen och sedan vi startade 2008 är vi dedikerade att leverera denna naturens visdom!

*Royal Green*

ENJOY LIFE, STAY HEALTHY

På Royal Green tror vi att det bara finns ett sätt att njuta av livet på ett hälsosamt sätt: naturens sätt! Vi använder bara ingredienser av högsta kvalitet. Alltid ren natur, säker och om möjligt certifierad ekologisk. Organiska ingredienser är en gåva av naturen och vi på Royal Green brinner för att leverera denna naturens visdom. Vi tar väl hand om vår vackra planet och stöder aktivt ekologiskt jordbruk och hållbart jordbruk över hela världen. Så njut av livet och håll dig frisk!

100% organic and free of (natural) flavourings

## Tea & Herbal infusions

Welcome to the wonderful world of tea and herbal infusions. Over the years it has become clear to us that there are big differences in quality in tea and herbal infusions. Most brands use (natural) flavourings and therefore you do not taste the real flavour of the herbs, fruit or plants used in the tea. Therefore It was time for our own tea and herbal infusion range, completely free of natural flavourings and other additives.

### Great Taste Awards 2019

Great Taste, organised by the Guild of Fine Food in the UK, is the acknowledged benchmark for fine food and drink. It has been described as the 'Oscars' of the food world. How special that 3 months after the introduction of our tea and herbal infusion range we immediately received 2 Great Taste Awards. Try the exquisite flavour of our flavouring-free tea and herbal infusions.

## The unique quality of Royal Green

It all starts by selecting the best plants and herbs from all over the world. Sustainably grown without the use of pesticides and harvested at the right time. Rich in flavour and goodness. Our tea and herbal infusions are 100% certified organic and simply delicious.

### ✓ Free of (natural) flavourings

Many organic tea brands use natural flavourings. When flavourings are used, you do not taste the real herbs, plants, fruit and flowers used in the tea. Flavourings are created in a laboratory to add flavour and we believe that these do not belong in certified organic tea. We only use 100% genuine ingredients and never use (natural) flavourings, perfumes or flavour enhancers. You will experience the real flavour of the herbs and plants we use. Always!

### ✓ Not bleached

You will notice that our tea bags have a different colour than others. Most brands use chemically bleached, ultra white tea bags. Our tea bags are made from unbleached paper, staple-free and 100% biodegradable.

### ✓ Local employment

We have decided to do the entire tea and herbal infusion project in India, because it is important to stimulate local employment and to guarantee the highest quality. We grow almost all ingredients in India and these can be used immediately after harvest. The herbs do not have to travel an unnecessary distance, so no flavour and nutrients will be lost. Better for the flavour and for the environment.

## Tea

16 tepåsar i en ask

Naturkosmos AB - info@naturkosmos.se - 046-2717900

"Unfortunately, many people are incorrectly or not fully informed every day. For example, if one asks for a natural or whole food vitamin C, you often will leave the (health) store with an ascorbic acid (synthetic vitamin C) or calcium ascorbate (ester-C). Or if you ask for a product to strengthen bones, there is a huge probability that a calcium carbonate product will be advised. Calcium carbonate is chalk and pure rock! Some other examples of isolated vitamins and minerals are: magnesium oxide, cyanocobalamin (vitamin B12), selenomethionine (selenium), retinol palmitate (vitamin A) and the list goes on. These substances do not grow in soil, are not natural, but are artificially produced by pharmaceutical companies.

This needed to change and is the reason that I founded Royal Green in 2008.

Roy All Green: a lifestyle food & food supplements brand that is developed to be a truly whole food alternative to synthetic vitamins and minerals products that are available on the market.

Our commitment to certified organic ingredients is, among other things, reflected in our 'Essentials' range. An achievement which I am very proud of. We all are inspired by the power of Mother Nature and I am pleased to offer everyone that supports this, a choice in vitamins and minerals that is in harmony with their beliefs."

*Roy Jongens*
